LETTER FROM THE DIRECTOR

Thank you for visiting the website of "Green Bright Future" LLC.

"Green Bright Future" LLC is one of the first companies to provide environmental audit and environmental management consulting services. We offer a broad range of professional consulting services such as monitor the implementation of national programs, conducting DETA, auditing for environmental management plans and environmental compliance with legislation and regulations in accordance with the Mongolian national economic and social development needs.

Environmental audit is used as a tool to ensure the ecological security of a nation, support rational use and protection of natural resources during production, prevent of risks and negative impacts caused by natural and human activities, and implement institutional and legal mechanisms. This process is important to strengthen socio-ecological-economic relations.

We would like to express our deep gratitude to the clients, business partners, governmental and non-governmental organizations, and research organizations for your close cooperation and support.

We always do the best to be your trusted and reliable partner in the field of environment consulting.

BAIBOLD D

*Director, Senior Environmental Auditor,
Member of the Governing Board the Mongolian Environmental
Audit Association*

ABOUT US

"Green Bright Future" LLC was established in 2013 to provide environmental audit and environmental management consulting services. Our company was licensed to conduct environmental audits of business entities and organizations engaged in production and services using natural resources in the territory of Mongolia 2013 / B-006 License No. A/308 of the ESD dated October 24, 2013 and 3 year term extension of the license by Order No. A/55 of the Minister of Environment and Tourism dated February 06, 2020, 5 year term extension of the license by Order No. A/56 of the Minister of Environment and Tourism dated March 09, 2023.

The company offers consulting services which needs concept of sustainable development and national and international standards to citizens, business entities and organizations in the following areas. These include:

1. Environmental audit
2. Environmental compliance audit
3. Environmental performance audit
4. Audit of the environmental management system
5. Internal environmental audit
6. Environmental management systems and management consulting

Environmental audit plays important role in strengthening sustainable development concept through ensuring the national ecological security, promoting proper utilization and protection of natural resources of an enterprise, prevention and management of impacts and risks caused by natural and human activities, and implementation of institutional mechanisms.

Environmental audit is a key instrument to reduce and eliminate any negative impacts, damages and consequences on the environment from an organization, to improve the ecological and economic efficiency of an enterprise and organization and to assist them run environmentally friendly business and to protect and prevent from possible losses and risks. On the other hand, it facilitates the Specialized Inspection Agency to inspect the environmental performance of an enterprise and organization.

We always do the best to be your trusted and reliable partner in the field of environment consulting.

The page features a decorative border of vibrant green leaves and grass. The leaves are clustered at the top and bottom edges, with some extending into the central text area. The grass is depicted as a dense, green field at the very bottom of the page. The background is a light, soft-focus green gradient.

MISSION AND GOAL

Our mission is to provide consulting services and independent professional assessment by conducting environmental audit in accordance with the Mongolian legislation in context of the national economic and social development to identify environmental compliance and improve the environmental management of enterprises, to protect and prevent them from potential economic risks and to promote cleaner production and clean technologies.

In order to achieve our mission, we are putting a number of goals. These include:

- To provide high quality professional consulting services based on scientific results and meeting the concept of sustainable development and national and international standards;*
- To make independent, impartial, systematic, evidence-based conclusions and recommendations based on audit principles in auditing of environmental performance of an organization;*
- To identify audit findings and recommendations with involvement of professional auditors, leading scientists and experts*
- To recommend the latest advanced technology in the environmental audit recommendations in order to implement and promote environmental management system, environmental management of the enterprise, cleaner production and cleaner technology as well as increase efficiency of a firm or company, and protect a company or an industry from potential economic risks;*
- To cooperate closely with governmental and non-governmental organizations, research organizations;*
- To expand and strengthen foreign relations and cooperation.*

PROFESSIONAL STAFF

The company has a team of the experienced staff professionals and our in-depth knowledge in environmental audit and environmental management consulting services, research and implementation of projects and programs. The team consists of a Senior Environmental Auditor, two Environmental Consultant-Auditors, three Environmental Auditors and three Environmental Specialists and two supporting staff. In addition, we collaborate with 22 experts and specialists on a contractual basis for environmental auditing and environmental management consulting project.

Our experts have great experience in working in international and Mongolian central government agencies, the private sector, and civil society organizations, including the Asian Development Bank, the International Finance Corporation, and the European Bank for Reconstruction and Development.
